

How to look after the nebuliser

This nebuliser is the property of Taunton and Somerset NHS and is on loan to you. It is important that you look after it.

- **Each day:** Wash the nebuliser pot in hot soapy water (washing up liquid). Rinse under hot running water and leave to dry.
- **Once a week** unplug the machine and wipe it with a damp cloth to remove all dust.
- **Every 3 months** change the nebuliser pot and tubing. Throw away the old pot and tubing.
- **If the filter becomes dark,** change the filter.

If you have any problems with either the treatment or the machine please call:

Respiratory nurses – 01823 343461

Lung function physiologists -01823 342353

The respiratory department will contact you when your nebuliser & machine needs servicing. You or a **family member** will need to bring the machine and the mains lead to the department for this service.
