

**Nursing Care Plan:**

- Skin **assessment** with finger tip test where applicable
- **Consider** continence assessment
- **Review** toileting plan/continence devices
- **Manage/Treat** infection (bowel, urine or skin\*)
- **Wound assessment** including exudate and peri wound
- **Review** medication

**WHAT IS THE PRIMARY TREATMENT AIM FOR SKIN BARRIER PROTECTION?**

**Nursing Evaluation:** • Review skin care plan routinely • If there is no improvement after following the pathway for 5-7 days, discuss TV link nurse/TVN

**Fire Hazard.** Do NOT smoke or go near naked flames; clothing, bedding, bandages and incontinence pads with this product dried on them may catch fire more easily.

Always consult the Instructions For Use (IFU) for directions on how to use the products, contraindications, precautions and warnings.
