

# THE PERSON AT THE CENTRE OF ALL THINGS

# HOW DO YOU FEEL ABOUT SHARED CARE RECORDS?

Do you have any examples about how you use them?

When they have been used well?

Have you had any issues whilst using them?

What worries do you have about shared care records?

Can we talk to you further

Email: [Moira.Harley@somerset.gov.uk](mailto:Moira.Harley@somerset.gov.uk)

QUESTIONS:

YOU CAN ALSO  
RESPOND VIA

What the need is from care homes/providers to want access to Shared Care Records

How quickly would you like to do this once you have your own Digital Social Care record system in place?

what info is recorded (either in social care record or separately) around health checks for dental/oral health

what info is recorded (either in social care record or separately) around health checks for eyes

Would you consider sharing your info into SDeR?

### ***What providers is the SSCR linked to?***

The following organisations are linked to provide information to the SSCR:

- Yeovil District Hospital
- Somerset NHS FT
- St Margaret's Hospice
- Somerset County Council (currently only Adult Social Care information provided, but Children's Social Care can access the SSCR)
- 62 out of 64 GP Practices (West Coker Surgery and Preston Grove Medical Centre are not connected)
- [Leaflet-SIDeR-leaflet-2-print.pdf \(nhssomerset.nhs.uk\)](https://www.nhssomerset.nhs.uk/leaflet-SIDeR-leaflet-2-print.pdf)

# RESOURCES

[Digital Shared Care Records in Context: The National Strategy - Graphnet Health Ltd](#)

# Digitising Social Care (DiSC)

## Programme aims

Encourage all adult social care providers to adopt a Digital Social Care Record system

Use technology to help the frailest care home residents to avoid preventable falls

Use technology to help address a major health and care need in Somerset (TBC)

## In order to

Reduce errors in care provision by ensuring information about an individual's care needs and preferences is known to every professional and family involved in their care

Enable provider workforce to engage in digital more effectively

Reduce in the frequency and severity of incidents such as falls or medication errors leading to hospital admissions

Improve sharing of information so that ICS and commissioners can draw on timely and accurate data to inform commissioning, understand the needs and requirements of their local populations and manage health and social care services more effectively

Improve the productivity of care providers, for example by reducing the amount of time staff spend on paperwork and other routine tasks, to give care staff more time to spend interacting with people and delivering personalised care

## Programme team

Name	Organisation
Jules Bellew	Somerset County Council
Paul Coles	Somerset County Council
TBC	NHS Somerset
Jo Jones	Somerset County Council
Digital Outreach Communicators	NHS Somerset
